The Safety Section reports that during the month of June, 264 safety slips were received. This compares with 399 during May. On an average basis, the Safety Section receives 307 safety slips per month.

HOW GOOD DO YOU ACT?

"To look is one thing. To see what you look at is another. To understand what you see is a third. To learn from what you understand is still something else. But to act on what you learn is all that really matters." You can take a good hard look at your job and understand the safety aspects of what you see and learn from what you understand, but this knowledge should prod you into taking steps to preserve your health.
